

## ABSTRACTS

In this treatise, I have analysed the various causes of idea piracy in scientific area, the weak point of approach methode, the normative objection to prevent idea piracy etc., and proposed some points to notice about guideline formulation and some appropriate solutions for that.

The result of these analysis shows that the idea piracy and the expression piracy differ in the viewpoint of the concept of plagiarism(idea piracy and expression piracy), the limit of quotation, the intend to clearly state sources, the normative object to prevent piracy etc. So if the two concepts are included in the guideline, it would be so difficult for us to find a united concept and objective criterion of piracy.

According to this understand, I have reached the conclusion that it would be reasonable that we regulate the expression piracy by copyright act, but the other all unfair acts, for examples, the idea piracy, the acts against study ethics, the acts to injure fair estimate for research activities like double publication etc, the acts to make up falsely the treatises etc. by college guideline.

**Keyword** : plagiarism, plagiat, Plagiarum, idea, expression, idea piracy, expression piracy, criterion of piracy, guideline, double publication, Geistiger Diebstahl, Urheberchaft der Aberkennung, Unbewußte Entlehnung.
